

MOSCOW METHOD

TECH DIVERSITY RACE

Must

- Adequate charts into new canvas design (add off set variable)
- Resize charts due to new canvas design
- Duplicate pie charts and drop down menu (one for each)

Should

- Personalized colours to improve readability

Haven't

- Add functionality to compare more than 2 companies

Could

- Smooth transition in the pie chart visual when changing companies

TECH DIVERSITY GENDER

Must

- Adequate charts into new canvas design (add off set variable)
- Resize chart and allocate it into the left part of the canvas
- Add legend while the user hover the mouse in each bar
- Add mean values by gender into the right

Should

- Personalized colours to improve readability and to match with colour palette

Haven't

- Support for more than 2 genders for inclusion

Could

- Change chart type to stacked columns to better fit in Canvas (better fit since the canvas will be splitted into two)

PAY GAP

Must

- Adequate charts into new canvas design (add off set variable)
- Add stacked bars for each gender per year
- Add extra y axis with percentage from 0% to 100% (for stacked bars)

Should

- Hover in each bar with legend and percentage represented by that bar

Haven't

- Support for more than 2 genres for inclusion
- Select start and end year plus start and end month for deeper analysis, but requires month granularity in dataset

Could

- The chart bars gradually rise year by year when the user enters the page
- Add slider to choose date

AI USAGE

Must

- Collect data from survey
- Create a pie chart with frequency of “How often do you double-check AI-generated information for accuracy?”
- Add button to select gender (male or female)

Should

- Personalized colours to improve readability

Haven't

- Add functionality to compare both genders at the same time

Could

- Smooth transition in the pie chart visual when changing gender

Pay GAP per Job

Must

- Add colors to each bubble
- Add one color per job

Should

- General filters per gender

Haven't

- Add functionality to compare both genders at the same time

Could

- Interaction with the bubbles (make them smoothly move)

Climate Change

Must

- Adjust slicers into the canvas

Should

- Change colors to match with color palette

Haven't

- Add more data to improve data information

Could

- Add different types of filters (not only slicers)

Food Attitudes

Must

- Adjust filter into the proper place in the canvas

Should

- Adjust colors to match with the color palette

Haven't

- Add more data to improve data information

Could

- Add extra filters for legends

Vitamins Intake

Must

- Create filters to select specific years
- Create filters to select specific vitamins (add or remove them into the time series chart)
- Adjust chart into the canvas

Should

- Create filters to select specific vitamins (add or remove them into the time series chart)
- Improve line colors to match with color palette

Haven't

- Add more data to improve data information

Could

- Change legend location
